

# CLP Facilitates EV Charging

燃點生活力量  
Energy for Life

CLP 中電

# Background

- To demonstrate our support to EV, we would allow sub-metering for EV charging in high rise building.
- We just launched a new electricity supply scheme for EV charging in May 2015.

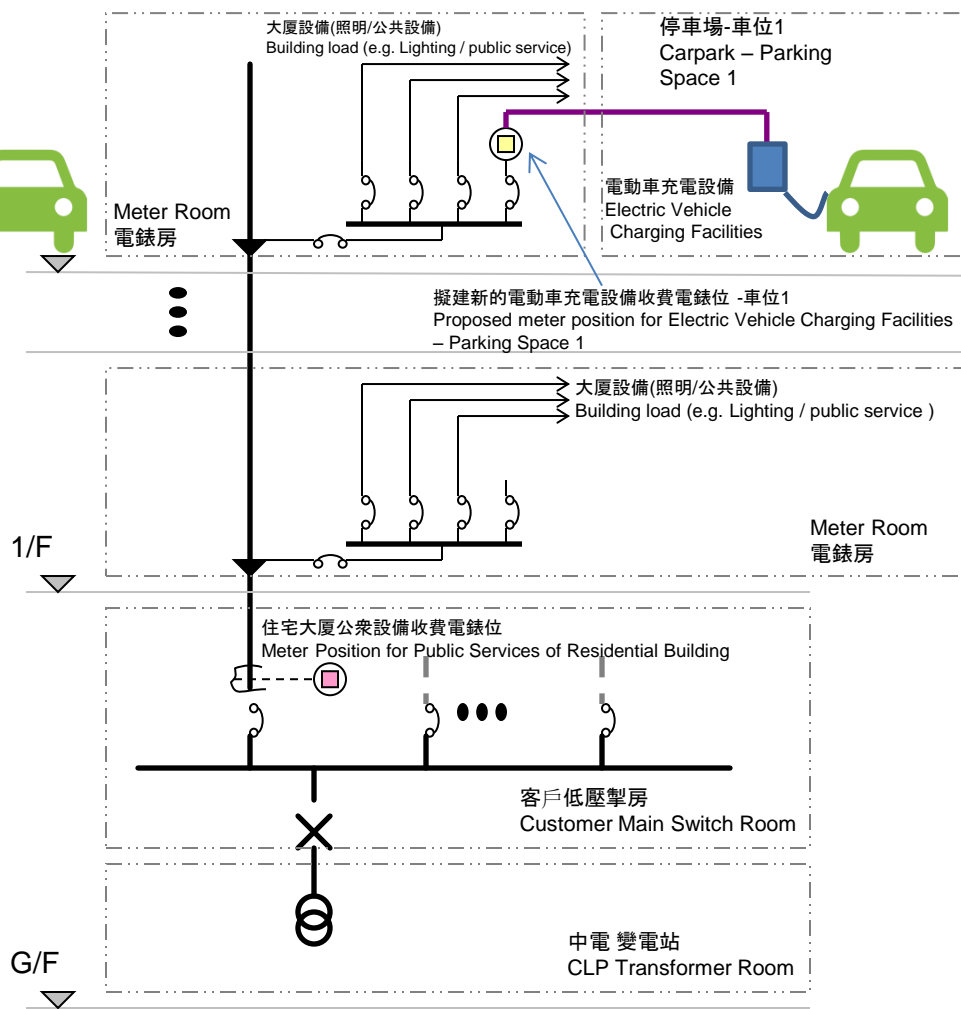

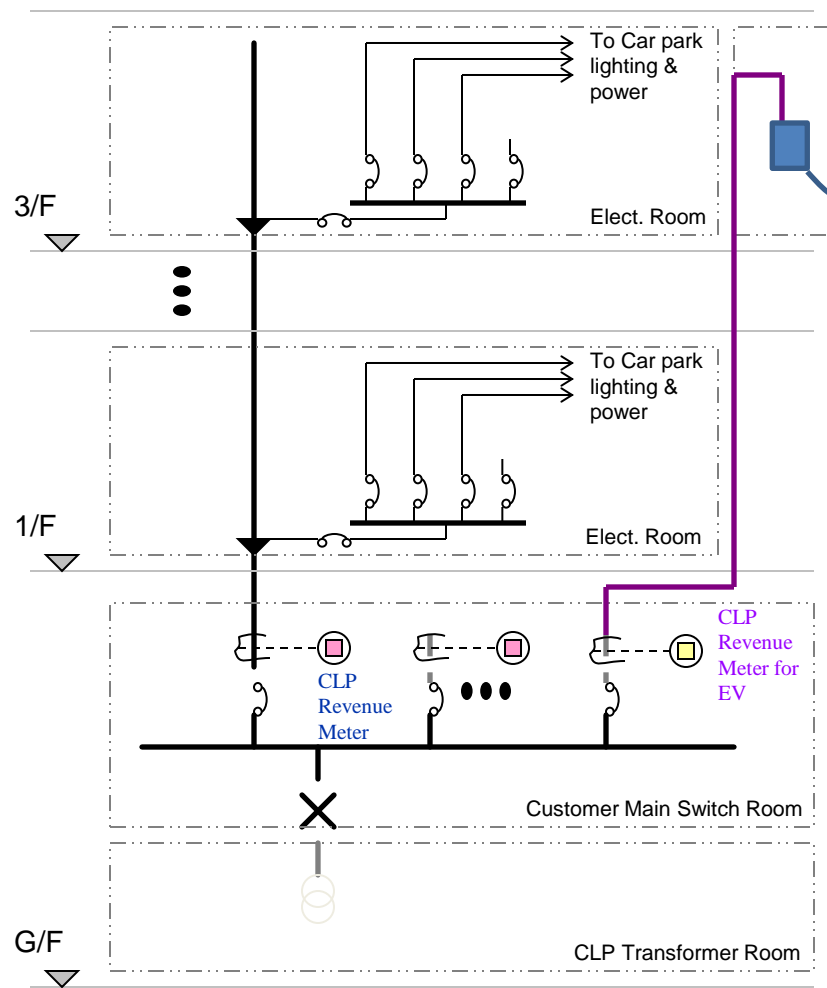

We want to facilitate customers in installing the EV Chargers and acquiring power supply in a more user friendly way.

# The Supply Scheme

- Eligible for those who own or rent a car park in a high rise building.
- Non-Residential Tariff (NRT) rates will be applied to the EV charging energy.
- Two metering options for choice.
- The charging facilities have to be installed by the customers.
- CLP will install a separate meter and open an electricity account for the EV charger.

**Option (1)** From building supply un-metered point (often far away from the car park)

**Option 2)** Tapping supply from the nearest common supply point plus sub metering

**Sub-metering option is allowed for EV charging**

# 333 Supply Scheme for EV Chargers

1. Application  
by Customers

2. Joint Site  
Visit &  
Technical  
Advice by CLP

3. Installation  
of EV Charging  
Facilities by  
Customers

4. Installation  
Inspection &  
Supply  
Connection by  
CLP

Fill **3** Forms

- NRT application
- Agreement of usage of rising main
- Agreement of sub-metering (if select this option)

Within **3** working days

- CLP will provide technical advice and metering requirements

Within **3** working days

- Customers should install the charging facilities according to CLP's requirements

- If the inspection results are satisfactory, CLP will connect the supply on the same day
