A Joint Seminar on Setting Up Electric Vehicle (EV) Chargers in Existing Private Residential and Commercial Buildings **29 June 2015 (Monday)**

Replacing conventional vehicles with EVs can help improve roadside air quality and reduce greenhouse gas emissions. The Government has been promoting the wider use of EVs in Hong Kong. The availability of chargers is crucial to promoting the wider adoption of EVs. To facilitate wider use of EVs, Environmental Protection Department (EPD) encourage the property management companies to facilitate setting up chargers at existing private residential buildings and install more chargers at commercial buildings. To encourage property management companies to set up electric vehicle (EV) chargers in existing private residential and commercial buildings, this seminar aims to addressing the concerns on the technical issues and institutional barriers in setting up EV chargers, with the sharing of successful stories. Please refer to the following for details:
